

TURNER DERMATOLOGY EMAIL CONSENT

Very Important: Please Read!

- HIPAA stands for the Health Insurance Portability and Accountability Act
- HIPAA was passed by the U.S. government in 1996 in order to establish privacy and security protections for health information.
- Information stored on our computers is encrypted.
- Most popular email services (ex. Gmail, Yahoo) do not utilize encrypted email.
- **When we send you an email, or you send us an email, the information that is sent is not encrypted. This means a third party may be able to access the information and read it since it is transmitted over the Internet. In addition, once the email is received by you, someone may be able to access your email account to read it.**
- Email is a very popular and convenient way to communicate for a lot of people, so in their latest modification of the HIPAA act, the federal government provided guidance on email and HIPAA.
- The office may contact patients via the WEAVE communication platform.
- The information is available in a pdf (page 5634) on the U.S. Department of Health and Human Services website:
 - <http://www.gpo.gov/fdsys/pkg/FR-2013-01-25/pdf/2-13=-1-73.pdf>
- The guidelines state that if a patient has been made aware of the risks of unencrypted email, and that same patient provides consent to receive health information via email, then a health entity may send that patient personal medical information via unencrypted email.

ALLOW UNENCRYPTED EMAIL

I understand the risks of unencrypted email and do hereby give permission to Turner Dermatology to send me personal health information via unencrypted email.

I have read, understand, and will comply with the information contained within this Email Policy.
